

# EU Type Examination Certificate

Date: 2023/01/16

n. **525230301/OE**

Validity: 2028/01/15

This Certificate cancels nr. 525164002/OE dated 2016/10/06.

The hereunder described items of Personal Protective Equipment have overcome positively the "EU type examination" (Module B), proving their conformity to the safety and health requirements of the Regulation (EU) 2016/425 (Annex II)

Manufacturer: (Responsible of the PPE)	<b>LEATT CORPORATION</b> 12, Kiepersol Cresc., Atlas Gardens – Contermanskloof – DURBANVILLE – ZA-7550 CAPE TOWN – SOUTH AFRICA
Type of PPE:	<b>"Body-armor" for use by motorcyclists – including protectors of the back and chest against mechanical impact.</b>
Category of PPE:	II : "medium" risks. This certificate is based on reference standards listed below: its validity is no longer ensured should new version of the standards come into force.
Model:	<b>"Chest Protector LEATT 4.5 #Jr</b> black/red OR orange/white <b>Codes: 5017120114 / 115 + 5017120120 / 121 (*)</b>

Description: (\*)= 4 codes to identify difference in: colors, commercial sizes (suggested height).

## ORANGE/WHITE

## CHEST PROTECTOR:

design: multilayer construction;  
external shell: orange partially perforated rigid polymeric material stitched onto the inner part and black marked "4.5 LEATT" with insert made of black elastomeric material;  
external coating: black fabric matched with a foam material;  
mid-layer: foam material;  
internal coating (in contact with the body): black fabric matched with a foam material;  
edge: black elastic fabric;

## BACK PROTECTOR:

design: multilayer construction;  
external shell: orange partially perforated rigid polymeric material stitched onto the inner part and black marked "4.5 LEATT" with insert made of black elastomeric material;  
external coating: black fabric matched with a foam material;  
mid-layer: - foam material; - black perforated knitting;  
internal coating (in contact with the body): black fabric matched with a foam material;  
edge: black elastic fabric;

## SHOULDER ZONE (connecting chest and back protector):

external coating: black fabric matched with a foam material;  
internal coating (in contact with the body): black fabric matched with a foam material;  
- black tape and red elastomeric material insert marked "BRACE ON";  
edge: black elastic fabric;  
fastening system of the body armor: by means of a black strap white marked "LEATT" with a black polymeric buckle closure.

**5017120114 + 120= ORANGE/ WHITE**

**5017120115 + 121 = BLACK/ RED**

Just differs for the color of the rigid shell + buckle color/LEATT prints – construction being exactly the same as described above.

## BLACK/RED

Technical Standard:	<b>EN 1621-2:2014</b>	Motorcyclists' protective clothing against mechanical impact - Part 2: Motorcyclists' back protectors – Requirements and test methods.
	<b>EN 1621-3:2018</b>	Motorcyclists' protective clothing against mechanical impact - Part 3: Motorcyclists' chest protectors – Requirements and test methods.
	<b>Me-int 097</b>	Body armor – assembly of protectors of the trunk and upper arms.

# EU Type Examination Certificate

Date: 2023/01/16

n. **525230301/OE**

Validity: 2028/01/15

Intended use:

Preventive use against mechanical impacts during motorcycling, quad and biking/  
downhill activities. This item must always be properly worn with suitable motorcycling  
garments and all other suitable P.P.E in order to ensure the most complete protection of  
the body.

Size range:

Type +  
Protector sizes:  
(area of protection)

CODE:	<b>CB = Central Back</b> Waist to shoulder length (in cm) in acc. with EN 1621-2:2014	<b>C = Full Chest</b>
<b>ALL CODES</b>	<b>28÷31,5 cm</b>	<b>Type A</b>

Technical File:

**DC-15857/E**

Test report:

**RCT n° 4112932/E**

Functions and  
performance levels:

This body armour incorporates and combine the protective functions of the following  
certified protectors:

**EN 1621-2:2014**

Method: "kerbstone" at 50J: from the values of the transmitted force obtained at  
standard ambient conditions and after hydrolytic treatment (= wet conditions) the  
performance reached is: **level 2**.

**EN 1621-3:2018**

Method: "kerbstone" at 50J: a) impact force attenuation: "bar impactor kerbstone at  
50J" conditioning standard + hydrolytic treatment = **pass**; b) force distribution:  
OPTIONAL = PERFORMED with result: **pass** - so the performance to be displayed is **level 2**.

NOTE 1: The Norms EN 1621-1:2012 and EN 1621-2:2014 2 provide 2 performance levels and level 2 is  
the one offering higher performances. The Norm EN 1621-3:2018 provides for 2 levels of protection, of  
which lev. 2 is deemed to provide better protection - if the protector has passed ONLY the force  
attenuation = display performance 1- if also the force distribution is passed = display performance 2;  
GENERAL NOTE: The protective functions also depend on the correct positioning of the Body-Armor,  
which is not part of this assessment and falls within the responsibility of the user.

Marking:

2 OR more Markings (according to the nr of protectors included): main one with CE-  
symbol for the "complete" PPE = "Chest Protector 4.5 Jr" + one stitched on each  
protector composing the PPE item, and displaying the following information as required  
by each Standard:

- **CE Marking**;
- Name/Brand of the Manufacturer;
- item designation (commercial name + numeric code: unique and unambiguous);
- pictogram indicating the intended use (motorcycling), protector type and size, overall  
protective level achieved during laboratory tests and indication of the Standard(s) of  
reference;
- symbol "i in the booklet" to invite the user to read the Information Notice;
- additional information on other labels/hangtags: Category II + Notified Body nr.,  
website, "Made in...", internal codes, composition, washing & care instructions etc.
